Office Action Summary	Application No. 10/692,036	Applicant(s) GALUSTYAN, SVETLANA	
	Examiner Sue A. Weaver	Art Unit 3727	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3727

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Galustyan in view of Hucal.

Galustyan discloses a baby bottle with a nipple and cap and several containers with openings which are stacked end to end. Although there is no actual teaching of the use of threads and threaded recesses in the bottom of the containers to receive the openings of other containers, Hucal teaches such an arrangement to secure a stack of containers together. Therefore to have used such threaded connection to secure the bottle of Galustyan would have been obvious in view of such teaching by Hucal.

3. Claims 11-13, 15 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hucal in view of Zak.

To have secured the containers with dispenser caps of Hucal with threaded caps in the manner of Zak would have been obvious to one having ordinary skill in the art.

4. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claims 11 and 13 above, and further in view of Galustyan.

To have formed the caps with nipples so that the container assembly might be used for drinking would have been obvious in view of Galustyan.

5. Claims 16 and 18 rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claim 14 above, and further in view of Bennett.

To have optionally shaped the bottom recess to compliment the dispenser to closely enclose the dispenser would have been obvious in view of such teaching by Bennett.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hollander and Kohus show other threaded containers with dispensing caps. Stallings, Kosansvich, Ellis, Thompson, Kantner, Topfer, Berg et al, Hong, Rosen, Nakata and Gallois show other stacked containers.

7. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
